# Introduction

TROIS C-L | Maison pour la danse is the country's leading organisation for contemporary dance. Supported by the Ministry of Culture, it fulfils several roles on a nationwide basis:

- Supporting and producing artistic work
- Developing a contemporary dance network
- Providing continuing professional training

Our house is located at the Banannefabrik, an industrial building that used to be a fruit and vegetable storehouse, now rehabilitated into a creative space.

Our house is dedicated to artistic residencies, rehearsals and research. It consists in 3 studios (1 dance studio + 2 black boxes). We open our space once every month to the audience with our «3 du TROIS» evening and from time to time we host some shows in our biggest studio.

We are not a regular theater and therefore we do not have the same technical capacities in terms of equipment and crew.

# General information

## Grande salle / salle 3

Capacity of seats: 65 seats

Possibility to add 10 to 15 cushions on the floor

Total capacity in the house : 99 people

### Dimensions

Performing space: 10mx10m

Wooden floor: dark brown tinted oak tree

Height of the rig: 5,30m

## Dressing rooms

2 dressing rooms for 2 to 3 people each with shower and mirror

A light catering is at the company's disposal during set-up, rehearsal and show.

## Common areas

A kitchen is available with all necessary cooking utensils.

Still water is available in the kitchen at all time. For ecological reasons, we would like you to consider the use of reusable non-plastic bottles.

A washing machine, dryer and iron are available.

2 toilets (shared with the audience)

A meeting room with high-speed internet is available upon request.

### Cleaning

A total cleaning of stage and common areas will take place before the show.

# Timetable & crew

Please note we do not have a technical director working full time in our house. We use the services of a very competent free-lancer.

A typical working day for the technical crew consists of 1 or 2 shifts of 4 hours each. The maximum duration of one working day cannot exceed 10 hours.

A typical timetable looks like this:

10:00 - 14:00: 1st shift

14:00 - 14:30 : lunch break

14:30 - 18:30: 2nd shift

This timetable can of course be adapted according to the needs of the company.

---

In case of a participation in a 3 du TROIS event (work-in-progress presentations), 4 hours of technical assistance are covered by TROIS C-L. The schedule will be sent to all participating companies approximately 2 weeks before the event to share the stage for rehearsals and technical assistance. No additional technical equipment can be rented.

In case of a show, we typically propose:

- 4 hours of pre- set-up the day before the arrival of the company
- 8 hours of set-up and rehearsals with our technician the day before the show or on the day of the show

We can of course adapt this depending on the needs of the company.

The company agrees to use the equipment available and to adapt their light plot and all their technical needs if necessary. In case of a shared evening, the company must share the equipment with the other companies participating.

Every additional technical renting request or need of additional crew/working time must be negotiated and agreed on between TROIS C-L and the company.

Access to the stage and/or to the technical rooms must be authorised by TROIS C-L's team.

---

We remain at your disposal to prepare the ideal schedule corresponding to your piece needs and to facilitate your work !

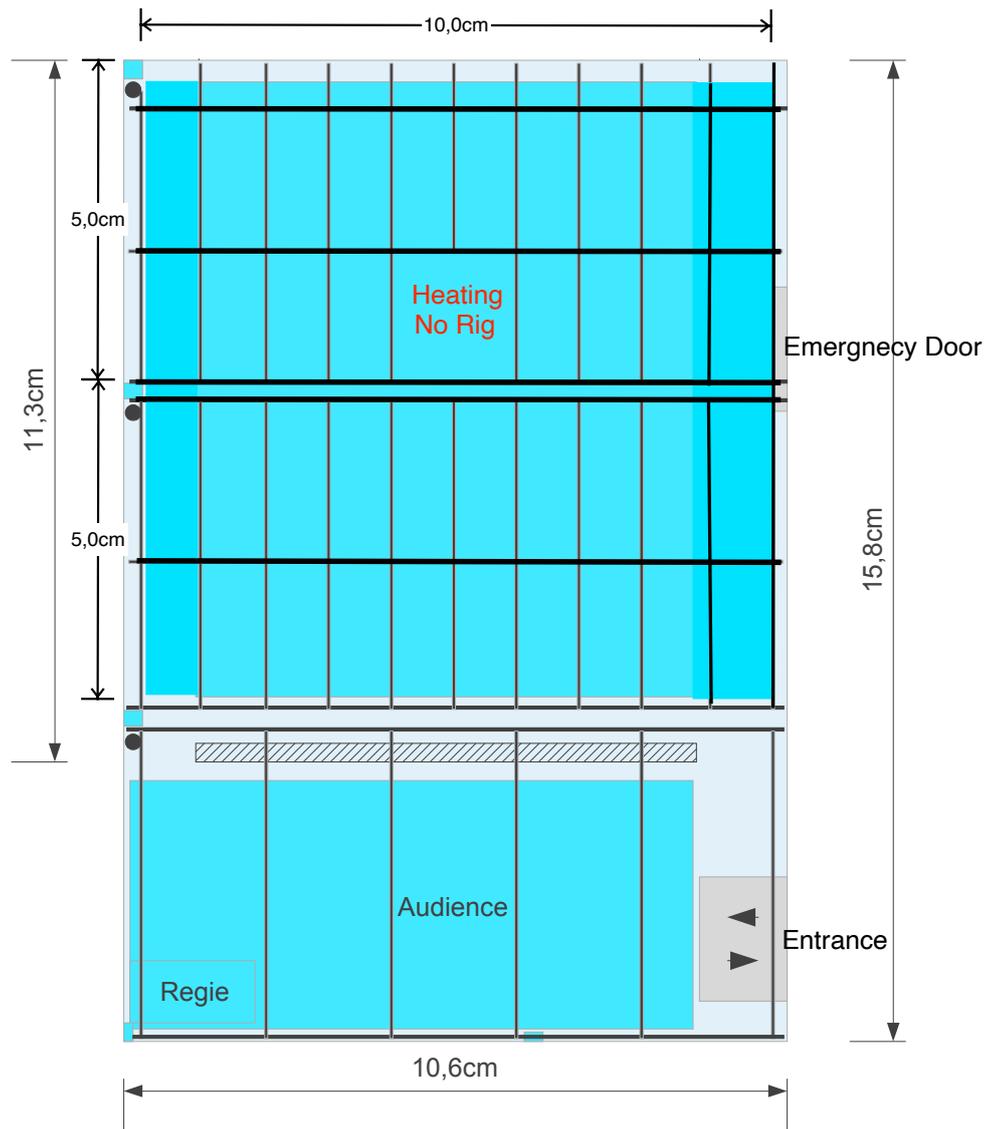

**Please note : hanging performers from the roof is strictly forbidden!**
